**Compact Power Systems the Makers of Cellboost™**  
**Clarifies involvement with Cell Power Technologies**

*Company officials want to clear any confusion in the business community*

December 6, 2004, Woodland Hills, California - Compact Power Systems, Inc. (CPS), headquartered in Woodland Hills, California, the global marketing and sales company for Cellboost™, the popular and patented disposable battery/charger for cell phones, has released a statement for clarification purposes relating to the company “Cell Power” out of Brooklyn, New York.

Compact Power Systems is not partnered, or joint ventured with Cell Power in any way. Pursuant to certain agreements, Compact Power Systems remits to Cell Power royalties for sales of Cellboost units in the Americas. Additionally, Cell Power has exclusive sub-distribution rights with respect to Cellboost in South America.

Compact Power Systems is a company dedicated to making disposable charging devices for mobile wireless products. Its flagship product, Cellboost, has been a strong success with the cellular phone market, and the company will be introducing Cellboosts for “other product categories” at CES in Las Vegas, per a company spokesperson.

**About Compact Power Systems, Inc.**      Compact Power Systems, Inc., makers of Cellboost™, is dedicated to supplying instant battery power to portable devices in order to overcome energy/power limitations in today’s mobile society products. The company is based in Los Angeles, California.
