**COMPACT POWER SYSTEMS EXPANDS DISTRIBUTION OF CELLBOOST™
PORTABLE POWER SOLUTIONS TO AIRPORTS NATIONWIDE**

*Travelers On the Go Will Have Increased Access to Anytime, Anywhere, Power
at All Brookstone and HMS Hosts Airport Retail Outlets*

LOS ANGELES, CA (October 20, 2005) – Running through the airport to make your connection is the last time when you want to find our cell phone out of juice - no time to stop and find an outlet to plug in your charger. You think your iPod has enough juice for the flight home when all of a sudden it stops playing as you are running to your flight. Your boss has sent an e-mail to your BlackBerry marked “high importance,” just as your last battery bar disappears. You pick up your cell phone to answer a call from your friend who just got off a 12 hour flight when all of a sudden your cell phone battery dies.

The solution to all of these battery problems is finally here!

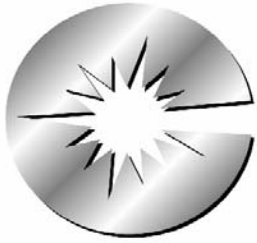

Compact Power Systems, LLC. (CPS), makers of **Cellboost™** portable power solutions, today announced distribution of select products from their line, including Cellboost for cell phones and smart phones to be available at all Brookstone airport locations and all HMS Host airport retail outlets.

“Because travelers are on the go, they do not always have time to wait for their portable electronic devices to charge,” said Rodney Rad, director of marketing for CPS. “Cellboost provides portable power and the luxury of not having to hunt for an electrical outlet or fumble with change for the pay phones when you want to check the latest emails from the office or the message from your significant other.”

CPS offers a complete line of portable power solutions for Apple iPod, iPod mini, and iPod shuffle; the new Sony PSP; Nintendo Game Boy Advance SP and DS systems; camcorders. Cellboost keeps portable electronic devices powered for one-to-eight hours when batteries die or are low and recharging is not an option. The full product line is available at Radio Shack and CompUSA stores nationwide.

Featuring the same patented technology as the company’s popular Cellboost product for the leading cell phone brands, the newest products by CPS, offer instant and inexpensive battery power for today’s electronics dependant consumer. The pocket-sized new line of accessories, inserted into the same port as the standard AC charger, will restore power to dead or dying devices within seconds, without using electrical outlets, battery changes or cords. The Cellboost units simultaneously power and charge the devices; can be used in one charging session or several; and can be thrown away when the power is exhausted.

Additionally, the Cellboost line includes a line of LiIon rechargeable solutions, iRecharge™, designed to provide alternative backup power for iPod, iPod mini and iPod shuffle. iRecharge will give an extra twelve hours of play time to iPod and iPod mini users, and an extra 40 hours of play time to iPod shuffle users, and can be recharged for repeated use.

The complete family of Cellboost and iRecharge products include:

- **Cellboost for Cell Phones** (MSRP \$7.99), delivering an average of 60 minutes of usage time / 60 hours of standby time for the world’s leading cell phone brands including: Nokia, Motorola, Samsung, LG, Sony Ericsson, Siemens, Sanyo, and Audiovox. For a detailed list of compatible phones please visit www.Cellboost.com.
- **Cellboost for Smart Phones** (MSRP \$7.99), delivering an average of 60 minutes of usage time / 60 hours of standby time for devices such as RIM’s BlackBerry and PalmOne’s Treo, including the new 650 Treo series.
- **Cellboost for Camcorders** (MSRP \$14.99), supplying 60 -100 minutes of extra recording time for almost all major brands including: Sony, Canon, JVC, Samsung, Panasonic and Hitachi camcorders.
- **Cellboost for Nintendo Game Boy Advance SP and DS** (MSRP \$8.99), providing six hours of additional playing time for Nintendo handheld systems.
- **Cellboost for Sony PSP** (MSRP \$9.99), providing two hours of additional playing time for the Sony PSP handheld systems.
- **Cellboost for Apple iPod and iPod mini** (MSRP \$9.99), delivering eight hours of additional play-time for Apple iPod and iPod mini.
- **iRecharge by Cellboost: The LiIon Rechargeable Battery Pack with Belt Clip for Apple iPod and iPod Mini** (Value Pack MSRP \$79.99), a belt clip solution that provides 12 hours of additional play-time and can be recharged for repeated use. The package, called the “Value Pack for iPod” or the “Value Pack for iPod Mini,” will include an iRecharge, a removable belt clip, a protective case designed exclusively with the use of iRecharge and a Cellboost that works with the iPod and iPod mini.
- **iRecharge by Cellboost for the iPod shuffle** (MSRP: \$39.99): This LiIon battery pack will provide the iPod shuffle with 40 hours of additional play-time. The unit is rechargeable and is small enough to fit in your pocket. The package comes with an added bonus - three silicon sleeves that allow you to protect your iPod shuffle from scratches and breaking.

Additionally Cellboost is available around the world in Italy, France, the United Kingdom, Ireland, Spain, South Africa, Mexico, India, Israel, Canada, Costa Rica, and Ecuador.
