**COMPACT POWER SYSTEMS TO PREVIEW IRECHARGE™ FOR LAPTOPS,  
IPOD NANO, PORTABLE DVD PLAYERS, SONY PSP AND CAMCORDERS AT  
THE 2006 INTERNATIONAL CES SHOW**

*Rechargeable Product Line Provides Rechargeable Power Anytime, Anywhere*

*Las Vegas Convention Center – Booth # 13614 – Central Hall*

**LAS VEGAS, NV (January 3, 2006)** – For anyone who made a New Year’s resolution to workout more, capture more family moments, catch up on old movies, make it to the next level of their video game or get out the office and work remotely, Compact Power Systems, LLC. (CPS), the makers of the Cellboost line of products, today previewed their new, expanded iRecharge line at the 2006 International CES Show. The new line, which features iRecharge for the iPod nano, camcorders, portable DVD players, Sony PSP and laptops, provides between three and 12 additional hours of rechargeable power, helping everyone keep their New Year’s resolutions.

“Consumers frequently cite limited battery life as one of their biggest frustrations with some of the newest products on the market, like the iPod nano and Sony PSP,” said CPS VP of Marketing Rodney Rad. “The iRecharge line will extend users’ enjoyment of these and other mobile electronics by providing compact and affordable rechargeable power.”

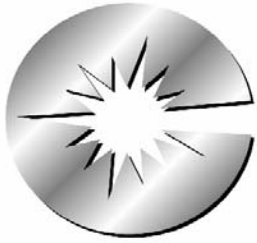

The iRecharge models fit seamlessly into the standard AC charging port while restoring power to the dead or dying device within seconds, without using electrical outlets, battery changes or cords. Featuring the same design and technology as the company’s popular iRecharge for iPod, iPod mini and iPod shuffle, the new iRecharge line simultaneously powers and recharges mobile electronics devices anywhere you go.

“How many times have you settled into your plane seat to write a proposal on your laptop and run out of power before you hit a cruising altitude? Or left for a five-hour road trip and found that there is only enough battery life in your portable DVD player for the kids to watch one movie? We live our lives on the go and need our mobile devices to be powered at all times,” continued Rad. “The new iRecharge line was created in response to a consumer need for instantaneous, portable power that can repeatedly be recharged.”

CPS can be found at CES in booth #13614 in the Central Hall of the Las Vegas Convention Center.

The complete family of iRecharge products include:

- **iRecharge for Laptops** (MSRP \$149.99), a small, lightweight and low cost external lithium ion battery that provides up to three extra hours of usage time, is compatible with leading laptop brands, charges with your laptop’s AC adaptor and features the patented iTip technology.

- **iRecharge for iPod nano** (MSRP \$49.99), a super slim, long-life, external lithium ion battery, provides up to 12 hours of additional play time, doubling the battery life of your iPod nano, while charging with any iPod charger and includes a belt clip.
- **iRecharge for Sony PSP** (MSRP \$29.99), an ergonomically designed external lithium ion battery, provides up to eight additional hours of playing time and charges with the PSP charger. The unit also provides an integrated stand for movie watching and convenient charging.
- **iRecharge for Portable DVD Players** (MSRP \$59.99), a small, external lithium ion battery that provides up to three extra hours of running time, doubling the movie-playing time of most portable DVD players. The model is compatible with the leading portable DVD player brands, with a switchable voltage design.
- **iRecharge for Camcorders** (MSRP \$49.99), a compact, lightweight, high-capacity lithium polymer external battery that provides up to three hours of extra recording time and is compatible with Sony, Canon, Panasonic, JVC, Hitachi and Samsung camcorders.
- **iRecharge for iPod and iPod mini** (Value Pack MSRP \$79.99), a belt clip solution that provides 12 hours of additional play time and can be recharged for repeated use. The package, called the “Value Pack for iPod” or the “Value Pack for iPod mini,” includes an iRecharge, a removable belt clip, a protective leather case designed exclusively with the use of iRecharge and a Cellboost that works with the iPod and iPod mini. The Value Pack for iPod also works with the new iPod video.
- **iRecharge for iPod shuffle** (MSRP \$39.99): This Lithium Ion rechargeable battery pack will provide the iPod shuffle with 40 hours of additional play-time. The unit is rechargeable and is small enough to fit in your pocket. The package comes with an added bonus - three silicon sleeves that allow you to protect your iPod shuffle from scratches and breaking.

Additionally Cellboost is available around the world in Italy, France, the United Kingdom, Ireland, Spain, South Africa, Mexico, India, Israel, Canada, Costa Rica, Ecuador and other countries worldwide.
