LOS ANGELES POLICE DEPARTMENT GETS NEW TECHNOLOGY TO KEEP OFFICERS CONNECTED ANYTIME/ANYWHERE

*Cellboost Donates Mobile Power Technology to the LAPD to Support All Department BlackBerrys,
Assuring That Officers Will Never Be Out Of Contact Due to Dead Batteries*

LOS ANGELES, CA (June 21, 2005) – The LAPD today received a shipment of nearly 500 Cellboosts for BlackBerrys to help the LAPD stay connected when batteries die or are low on battery power, and recharging is not an option. Compact Power Systems, LLC., (CPS) the makers of **Cellboost™** portable power solutions donated the product as part of their larger corporate giving program.

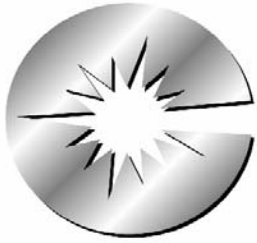

“Cellboost gives our BlackBerry users that added security of knowing that they will never be left powerless when it comes to communicating from the field,” said a representative of the Department.

The Police department plans to issue the Cellboosts to all BlackBerry users. The LAPD issues BlackBerrys to key personnel, which are used for off-hour notification and also while responding during major incidents.

“Because the shelf-life is three years or more, the Cellboost is uniquely suited for the LAPD’s needs,” said Kai Clarke. “We are proud to be providing any assistance we can to help out our police department and their communication needs.”

Cellboost allows you to continue using your phone or BlackBerry while simultaneously charging it with 60 minutes of talk time or usage time / 60 hours of standby time. The pocket-sized accessory, inserted into the same portal as the standard battery charger, restores power to a dead or dying phone within seconds, without using electrical outlets or cords, or changing batteries. The Cellboost units simultaneously power and charge; can be used in one charging session or several; and can be thrown away when the power is exhausted.
