### **COMPACT POWER SYSTEMS EXPANDS CELLBOOST™ LINE FOR CELL PHONES**

*Power Solutions Now Available for New Cellular Phones  
Company Broadens Retail Presence*

**LOS ANGELES, CA (April 11, 2005)** – Compact Power Systems, Inc., (CPS) makers of **Cellboost™** portable power solutions, today announced it has expanded its cell phone product line and has launched several new company growth initiatives. Cellboost, which provides power to cell phones when batteries die or are low on battery power, and recharging is not an option, is now available for new Nextel phones and BlackBerrys.

Additionally, the company has expanded its retail presence to over 80,000 outlets; has chosen Fleishman-Hillard International Communications as its public relations agency of record; and has added industry veterans Kai Clarke as president, Patrick Byrne as senior vice president of sales and Randy Miller as international vice president of sales to its management ranks.

“The expiration of your last battery bar is a fact of life for many cell phone users,” said Clarke. “With the growing demand for our Cellboost products for cell phones, Cellboost is excited to announce that our product is now compatible with Nextel phones and BlackBerrys. This expands our coverage to nearly all cellular phone brands from Nokia, LG, Motorola, Siemens, Sony Ericsson, Sanyo and Samsung.”

Continued Clarke, “In the near future we will be announcing a Cellboost model for Treo phones and a compatible model for the new LG phones from Verizon.”

Cellboost allows you to continue using your phone while simultaneously charging it with 60 minutes of talk time / 60 hours of standby time. The pocket-sized accessory, inserted into the same portal as the standard battery charger, restores power to a dead or dying phone within seconds, without using electrical outlets or cords, or changing batteries. The Cellboost units simultaneously power and charge; can be used in one charging session or several; and can be thrown away when the power is exhausted.

Cellboost for cell phones product line has expanded its retail presence from 10,000 stores to 80,000 outlets nationwide, including Office Depot, Wal-Mart, Radio Shack, Ralph’s, Sav-On, Albertsons, Staples and Cingular Wireless. The products retail for between \$5.99 and \$7.99. Additionally, the Company distributes globally with sales in Canada, Italy, Germany, France, Ireland, the UK and India. By the end of 2005, it is expected that Cellboost will be available in over 120,000 stores worldwide.

To complement the expansion, CPS recently hired National Retail Services (NRS) to provide sales training and merchandising for retail stores carrying Cellboost products, in order to provide product demonstrations and collect data to analyze.

“To mark our retail expansion, we currently are offering our customers a buy-one-get-one-free offer at select retailers, including Office Depot, Staples, Ralph’s and Sav-On, to name a few,” said Clarke.

CPS has also named Fleishman-Hillard International Communications as its public relations agency of record. Fleishman-Hillard will assist with the company’s growth and new market expansion through communications, cross-promotions, marketing, and strategic media relations.

“As Cellboost continues to grow and develop additional revenue streams and products, we are calling on Fleishman-Hillard’s expertise in consumer marketing, technology, and global capabilities to extend our visibility domestically and internationally,” said Clarke.

The recent growth of Cellboost has taken place under the direction of industry veteran Clarke, recently named President of CPS. Clarke previously held executive positions at InFocus, Planar Systems, Energizer Inc. and Gillette/Duracell. He brings nearly two decades of experience building retail, commercial and Original Equipment Manufacturer channels for a wide range of consumer electronic products.

Prior to joining CPS in 2003, Patrick Byrne held positions from director to vice president of sales with companies such as Sony, Toshiba and Emerson Radio. Randy Miller is the past vice president of international sales and commercial software sales at Reallusion, Inc.

**About Compact Power Systems, Inc.**

Compact Power Systems is a global provider of portable power solutions designed to overcome today’s energy limitations for cellular phones, smart phones, camcorders, Apple iPods, Nintendo portable systems, and other mobile devices.
