**New Cellboost™ Disposable Battery/Chargers for Smart Phones,
Camcorders, Game Boys and iPods To Be Previewed at CES**

Will Instantly Restore Battery Power with Same Technology as Cellboost for Cell Phones

LOS ANGELES (January 6, 2005) --- Compact Power Systems, Inc., today announced the expansion of its Cellboost™ line of disposable battery/chargers for cell phones with new applications for smart phones, camcorders, Nintendo Game Boy Advance SP and DS systems, and Apple iPods. The new offerings will use the same technology as the company's highly successful patented Cellboost cell phone battery/chargers to restore power to dead or dying mobile devices instantly and inexpensively with no need for an electrical outlet, no cords and no aggravation.

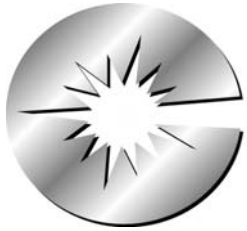

The expanded product line will be shown at the 2005 Winter Consumer Electronics Show that opens in Las Vegas today. Models are scheduled to be available for purchase through major U.S. distribution in the second quarter of the year.

Like the original Cellboost product for cell phones, the new models will be compact, highly portable, and capable of bringing powerless or near-powerless devices back to life without any external electricity, battery changes or significant charging time.

Users will be able to start talking, emailing, recording, gaming, playing their digital music or using any of their product's functions within seconds of plugging the Cellboost battery/charger into their device's charging port. The Cellboost units will also allow for users to continue usage while simultaneously charging their device. Cellboost can also be used in one session or several, and can be thrown away when its power is exhausted.

The new products will include:

- **Cellboost for Smart Phones** --- delivering an average of 60 minutes of talk time / 60 hours of standby time for leading devices including RIM's BlackBerrys, PalmOne's Treos and Danger's Sidekicks.
- **Cellboost for Camcorders** --- supplying recording time comparable to a standard on-board battery and supporting Sony, Canon, JVC and other leading brands.
- **Cellboost for Nintendo Game Boy Advance SP and DS** --- providing several hours of additional playing time.
- **Cellboost for Apple iPod** --- delivering several hours of additional playback time.

COMPACT POWER SYSTEMS, INC.

the makers of **Cellboost**

“Battery power remains the Achilles heel of today’s portable hardware devices, and our Cellboost products have proven to be a practical answer for people whose cell phones die when they don’t have access to a wall outlet or can’t wait for a charging cycle,” said Todd Ruhalter, President of Compact Power Systems. “This extension of our product line brings those same benefits to a broad range of other mobile devices, ensuring that users can have power wherever and whenever they need it.”

About Compact Power Systems, Inc.

Compact Power Systems, Inc., the makers of Cellboost™, is dedicated to supplying instant battery power to portable devices in order to overcome energy/power limitations in today’s mobile society products. Cellboost for cell phones is sold in over 80,000 U.S. storefronts, including major chains such as Radio Shack, Office Depot, Office Max, K-mart, Wal-Mart, Staples, 7-Eleven, Cingular Wireless, and AutoZone. It is also sold online at Buy.com and in several foreign countries. The company is based in Los Angeles, California. For more information, visit www.Cellboost.com.
